Issue:	No issue
Issue:	Version 2.2 November 2023 1:01 PM
Created:	11/02/2023 November 2023 9:11 AM
Updated:	17 April 2024

Issue: What is the purpose of the "for" loop?

Answer: The purpose of the "for" loop is to iterate over a range of values and execute a block of code for each value. It is commonly used for tasks such as calculating the sum of a range of numbers, finding the maximum or minimum value in an array, or performing a calculation on each element of a list.

Input Format:

The first line contains the number of test cases. Each test case consists of a number of values.

Output Format:

For each test case, the output should be the sum of the values.

Constraints:

1 ≤ n ≤ 1000

1 ≤ a[i] ≤ 1000

Sample Input 1:
